Ranier Bonnici

Lecturer, Software Engineer
Malta

Summary

I am a passionate educator and software consultant. My expertise is in the .NET framework, SQL Server, Next JS, and Supabase. I am also a Microsoft Certified Azure AI Engineer. I developed end-to-end solutions in the education, real estate, and financial services sectors.

During my Master's in ICT, I created models to measure, explain, and predict key CRM metrics such as customer satisfaction and retention. For my Master's in Entrepreneurship, I developed a business proposal for emergency evacuation software, earning first place out of 30 ideas at STUp! 2022 through my pitch.

Earlier in my journey, I proudly represented Malta at the International Olympiad in Informatics.

Experience

MCAST

ICT Senior Lecturer III
September 2009 - Present (16 years 5 months)
Paola, Malta

My responsibilities include lecturing, assessment, and mentoring. I teach units in Full Stack Development, Databases, Object-Oriented Programming, and Web Development, while also serving as the Institute Vocational Coordinator for Level 4 programmes.

In addition, I designed and implemented a comprehensive Management Information System that streamlined key administrative processes, including admissions, attendance, results, stipends, and student notifications. This system supported over 9,000 students and staff members, significantly improving efficiency and communication across the college.
